Profile Summary

IT professional with 7 years of experience in IT Operations and Application Support across BFSI and HR-LMS domains. Proven track record in incident management, production monitoring, RCA, SQL-based troubleshooting, release validation, and stakeholder communication — consistently ensuring application availability and SLA compliance.

Complementing this, I have built hands-on expertise in **Java, Selenium WebDriver, TestNG, SQL, Git, Gradle, and Page Object Model (POM)** framework development. Seeking a QA Automation Engineer, SDET, or Software Test Engineer role to leverage a unique blend of production support depth and automation skills to deliver reliable, high-quality software

Technical Skills

Programming Languages: Core Java, SQL (T-SQL)

Automation Testing: Selenium WebDriver, TestNG, Page Object Model (POM), Data-Driven Testing, XPath, WebDriverManager

Frameworks & Libraries: Apache POI, Page Factory, Data Providers

Build & Version Control: Git, Gradle

Databases: MySQL, Microsoft SQL Server (T-SQL)

Cloud & Infrastructure: AWS EC2, IAM, CloudWatch, CloudFormation, Ansible, Terraform

ITSM & Support Tools: ServiceNow

Development Environments: Visual Studio Code (VS Code)

Operating Systems: Windows, Linux

SDLC Methodologies: Agile (Scrum), STLC, Defect Life Cycle (DLC), Change & Release Management

Production Support: Incident Management, Problem Management, Root Cause Analysis (RCA), SLA Management, Production Monitoring

Work Experience

PricewaterhouseCoopers (PwC) Services LLP

Senior Associate – Senior Operations Support Engineer | July 2021 – Present | 5 years

- Owned enterprise-wide operational stability for PwC's global LMS network as primary escalation authority for complex, multi-platform incidents — consistently exceeding SLA commitments and sustaining near-zero downtime across regions and time zones.
- Built production-grade AI agents in Microsoft Co-pilot Studio to automate ServiceNow ticket trend analysis, cutting manual reporting effort by up to 90%; delivered executive-level monthly and quarterly performance reports translating raw data into KPI summaries, trend analysis, and improvement roadmaps.
- Led systematic RCA for chronic incidents, coordinating cross-functional teams to measurably reduce recurrence; managed incident, change, and problem responses with audit-ready rigor — partnering with internal and external audit teams to validate SOP and governance compliance.
- Served as senior technical liaison across engineering, integration, and business teams during full-cycle LMS implementations — owning pre-launch validation, risk assessment, and go-live assurance; drove continuous improvement by automating workflows and standardizing procedures to reduce operational toil.

Tata Consultancy Services (TCS)

Systems Engineer | June 2019 – July 2021 | 2 years

- Managed and supported AWS EC2 instances running RHEL, CentOS, and Ubuntu, performing system health monitoring (CPU, memory, disk), performance tuning, and capacity planning.
- Automated patch management using AWS Systems Manager Patch Manager; implemented infrastructure

automation using Ansible, Terraform, and CloudFormation.

- Configured IAM roles, security groups, Linux firewalls, and auditing via CloudTrail and auditd to ensure secure and compliant infrastructure.
- Designed and maintained backup and disaster recovery strategies using AWS Backup, EBS snapshots, and Route 53 failover.
- Configured VPCs, subnets, gateways, and managed storage services (EFS, NFS, S3); set up monitoring and logging with AWS CloudWatch and Linux system logs.

Projects

1.Crio Fellowship – Masters in QA Automation [July 25 - Present]

Qkart_QA [\[Link\]](#)

Skills: Java, Selenium WebDriver, TestNG, XPath, Apache POI, Page Object Model (POM), WebDriverManager, Gradle, Git, Assertions & Validations, Implicit & Explicit Waits, Data-Driven Testing, Test Listeners, Exception Handling

Testing:

- Developed an end-to-end Selenium WebDriver automation framework for the QKart e-commerce application by automating user registration, login, product search, cart management, checkout workflows, and validating application behavior using TestNG.
- Enhanced framework reliability by implementing dynamic XPath, implicit & explicit waits, data-driven testing with Apache POI, TestNG parameterization, test grouping, screenshot capture using listeners, and reusable Page Object Model components for improved maintainability and debugging.

2.Crio Fellowship – Masters in QA Automation [July 25 - Present]

Flipkart Automation [\[Link\]](#)

Skills: Java, Selenium WebDriver, TestNG, XPath, Page Object Model (POM), WebDriverManager, Gradle, Git, Assertions & Validations, Exception Handling, Wrapper Methods, Implicit and Explicit waits

Testing:

- Developed an end-to-end Selenium WebDriver automation framework for Flipkart, automating product search, filtering, sorting, and validation using TestNG and robust XPath locators.
- Extracted and validated product details including ratings, reviews, discounts, titles, and image URLs using assertions, explicit waits, and dynamic element handling.

3.Project Tango AC Buenos Aires – PwC

- Validated and reconciled 2,500+ learner accounts during a large-scale LMS migration, merging victim-to-survivor profiles by prioritizing higher completion precedence to ensure zero progress loss
- Migrated training records exclusive to victim profiles into survivor accounts, ensuring complete learning history continuity post-merge

4.Onboarding of new LMS application – PwC

- Managed end-to-end operational support for LMS data migration, coordinating the migration of user records and learning history while ensuring seamless integration with HRMS, Active Directory, and third-party content providers.
- Developed and maintained support runbooks, SOPs, and knowledge articles, while driving incident escalation, cross-functional issue resolution, and compliance with data privacy and audit standards.

Education

B. Tech | Electronics and Communication Engineering [2015-2019] *National Institute of Technology, Arunachal Pradesh - CGPA 7.32*
